ABOUT GO-BOX

Go-Box was created to give K12 schools a fast, easy and inexpensive way to deploy large quantities of Chromebooks.

Since 2016, nearly 1,000 school districts have used Go-Box to automate the repetitive enrollment and configuration processes on their new and existing Chromebook devices. With the experience of an estimated 1,200,000 Chromebook enrollments under its belt, Go-Box has best practices built right into the device that ensure Chromebooks are enrolled and configured exactly as needed for student use, at the highest units/hour throughput possible.

Schools using Go-Box are saving (tens of) thousands of dollars compared to traditional white glove fees. They’re able to bring their Chromebook deployments in-house, without over-burdening IT resources.

*Go-Box is designed, developed and manufactured in the USA (Newport News, VA)*
1:1 Creates Problems of Scale

When you’re dealing with just a few Chromebooks, the enrollment and configuration process isn’t too difficult. But when done manually (as shown to the left) and multiplied over hundreds or thousands of devices, these simple processes are exhausting and can grind IT operations to a halt for days and weeks at a time.

As a result, many school districts turn to expensive 3rd party “white glove” services that at $5-$10+ per device for a one time service, it can be very taxing on even the biggest IT budgets and doesn’t add long term value.

Go-Box solves these challenges by making in-house Chromebook deployments fast and easy.

Go-Box is the affordable in-house solution for K12 education. It quickly automates the enrollment and configuration processes on large quantities of Chromebooks.

- Powerful automation tool for Chromebooks
- Compatible with all Chromebook makes and models

“Go-Box is the #1 must have for all large Chromebook deployments.”
Simply connect to the Go-Box User Interface (shown on right) wirelessly from any browser to quickly configure your enrollment script using one of our pre-made templates. We provide all current Chrome OS version templates on the Go-Box, and newly released versions are always accessible to customers on our website for free.

Once your Go-Box is configured:
1. Power on the new Chromebook
2. Connect the Go-Box USB cable
3. Go-Box executes your script and prepares the Chromebook for student use!

Your script simultaneously configures up to 16 Chromebooks in less than 2 minutes in most environments. Asynchronous operation on each USB channel provides the highest provisioning throughput.

Go-Box also helps automate your re-enrollment processes on periodic Chromebook resets!
The Go-Box user interface is wirelessly accessible from any Chromebook or browser. This dashboard makes your configurations fast and easy, and the logging feature shows you exactly what your script is doing in real time to help you visually troubleshoot any issues and get your script working just right in a matter of minutes.

Once configured, your Go-Box operates standalone without needing to be connected to the UI.

*Pro Tip: Create and save up to 100 different script versions to handle variances at school locations, or to enroll batches of Chromebooks into different OUs!
In its simplest description, Go-Box is an asynchronously automated, 16 channel keyboard and mouse emulator. It is universally recognized by any device as a standard external keyboard and mouse, enabling Go-Box to be compatible with every Chromebook make and model, and even other devices that use external mouse and keyboards.

Powerful features are engineered into the hardware and software to provide fast operation and consistent output with the automated Chromebook enrollment process.

The automation script that Go-Box runs is a **Credentials File** and **Template File** pairing. These are separate so updates to the Chrome OS version are separated from your school’s environment specific credentials (Google login and password, WIFI SSID and password, etc.) saving you time and frustration whenever Google updates the Chrome OS (PS. we provide all Chrome OS update templates to customers for free!)

This structure also allows you to easily create, save and quickly switch between different Credentials Files to handle variances at school locations, or to enroll sets of Chromebooks into different Organizational Units (OUs). The possibilities are endless.

Go-Box has a 100% success rate working as advertised in every customer environment, including international locations. We stand by our product and guarantee that it will also work for you!

To watch a technical overview of how Go-Box operates, click the video thumbnail shown to the right.

WHAT CUSTOMERS ARE SAYING

**Ryan Adkins**
Director of Technology
Yorkville 115 - Yorkville, IL

“This is great!!! Yorkville 115 has created our own white glove service using Go-Box. We can configure 24 machines in 2 min!”

**Scott Harris**
Technology Director
Neosho School District - Neosho, MO

“We had 1 person doing this job and he was able to provision all 1,500 Chromebooks in 3 days. By himself. The damn thing just works!”

**Heather Durre**
Technology Coordinator
Flora CUSD #35, Illinois

“I am thrilled with the Go Box and just amazed at the time savings! So glad I visited your booth this year!”

**Jim MacMahon**
Enterprise Network Infrastructure Coordinator
Central Okanagan Schools
Kelowna, BC Canada

“The Go-Box is working well, it now takes longer to plug the Chromebooks in than it takes to provision!”

**Jim Gaydusek**
Sr. IT Tech/Server Admin
Shelley Joint School District 60, Shelley, ID

“I love the Go-Box. I did over 1000 Chromebooks in about 3 days by myself. It was easy as can be to plug them in, let it work, and then on to the next set in roughly a minute and a half ... the Go-Box was a life saver for me!”

**Clint Lucy**
Director of Technology
Batesville School District
Batesville, AR

“Love it! It certainly performs as advertised and we greatly appreciate it. Go-Box really is that product we have been looking for! Thank you!”

*As we would also protect your time, please respect the time of these busy Tech Directors and Coordinators by not contacting them about Go-Box.*
Go-Box Warranty

Your Go-Box investment is protected by our manufacturer's warranty and fully supported during the 12 month warranty period.

Product Support

Our #1 goal is for you to have an amazing experience with your Go-Box

Each Go-Box comes fully supported with live help available Monday - Friday 8:00 AM to 5:30 PM Eastern time. Our support techs have extensive Chromebook deployment experience and are knowledgeable with enrollment best practices to help customers experience success with Go-Box in every unique environment.

- Need help customizing your script for a unique WIFI setup? No problem!
- Need help applying a new Chrome OS template to your Go-Box? No problem!
- Need help getting your script to run consistently? No problem!

Our friendly technicians are here to help with anything you're stuck on.
Go-Box can be purchased through OETC, an authorized Go-Box reseller. Contact the sales representative that sent you this brochure, call (800) 650-8250 or visit [https://oetc.org/catalog/](https://oetc.org/catalog/) to request a quote.

**HOW MANY GO-BOX UNITS DO I NEED?**

A general rule of thumb is to get one (1) Go-Box unit for each of your IT technicians that interact with Chromebooks on a regular basis.

An investment in Go-Box units will pay for itself on your first deployment.

And with zero ongoing fees or costs for non-profit and K12 education customers, Go-Box will continue to add value to your organization every time new Chromebooks come in, and every time you use it to automate the re-enrollment process when resetting existing devices. It’s a no brainer!
Go-Box is a wholly owned subsidiary of Spectrum Comm Inc.

Spectrum (not affiliated with Time Warner cable company) is a veteran-owned business headquartered in Newport News, VA that was founded in 1999 to serve the Department of Defense, federal agencies, and the education system through its Go-Box subsidiary.

We are proud to serve the men and women of the United States armed forces and to be a technology solutions provider for K12 education customers around the world.
